Professional Objective

Young and motivated enthusiast in robotics, 3D technical design, and PCB development with experience in mechanical and electronic design for robotics competitions. Eager to learn, improve technical skills, and gain practical experience, including working for a modest salary opportunity.

Education

Siguldas State Gymnasium (2025 – Present) — Grade 10
Graduated Grade 9 with a Mathematics exam result of 92%.

Experience and Projects

Latvian Robotics Competitions — Folkrace & BattleBot Participant (3 years)

- Designed 3D models using Fusion 360
- Developed electronics and PCBs for robot control systems
- Prepared and operated CNC milling and 3D printing processes

Skills

- 3D Modeling: Fusion 360
- CNC model design and milling operations
- PCB Design: Autodesk Eagle
- 3D printer setup and part manufacturing
- Good proficiency in Microsoft Office
- Event organization and teamwork

Additional Activities

- Participation in hackathons and robotics event organization
- Active involvement in technology and engineering enthusiast communities
- Online courses completed through Udemy and edX

Languages

- Latvian — Native
- English — B1
- Russian — C1 (limited communication)
